

I am writing to you today regarding NAB's Petition 04-160. I can't begin to tell you how ridiculous it is that I even have to explain why this petition SHOULD BE REJECTED!!!

Come on, haven't you done enough already!?

XM Radio is a subscriber based service (which is too bad because it is an amazing technology that should be available to everyone) that far outshines its competition. Because it is subscriber based service, THAT I PAY FOR, it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. Are they really serious - they want to stop providing Instant Traffic and Weather? Get serious and don't waste your time on this. I live and work around both Washington DC and Baltimore and I find that Instant Traffic has become an amazing way to keep me informed on my commute.

Please REJECT ?NAB's Petition 04-160?

Thank You,  
Scott Carstens
